

I pay to subscribe to XM Sattellite Radio because we do a lot of traveling by vehicle and it isn't always easy to find a local radio station that comes in for more than a few miles. Sattellite give me the availablity of keeping track of instant taraffic and weather in areas that I'm not familiar with. It should not be up to the Nat. Assc. of Broadcaster to dictate against this service that I'm paying for. I urge you to reject tha NAB's petition 04-160 and support my right to be provided with the kind of programming I pay for. It is not right that the NAB should be able to dictate what I can listen to.Thanks You.
